Knowing Your Weakness and Taking Action Before Attackers Do

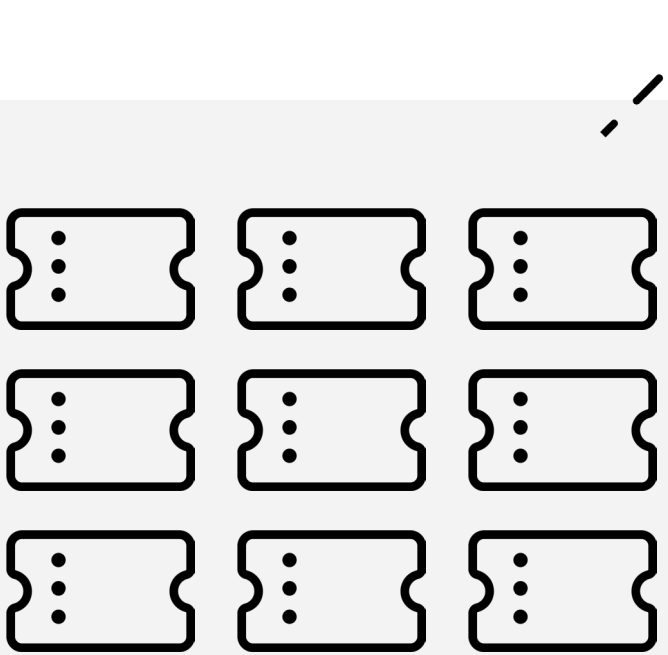
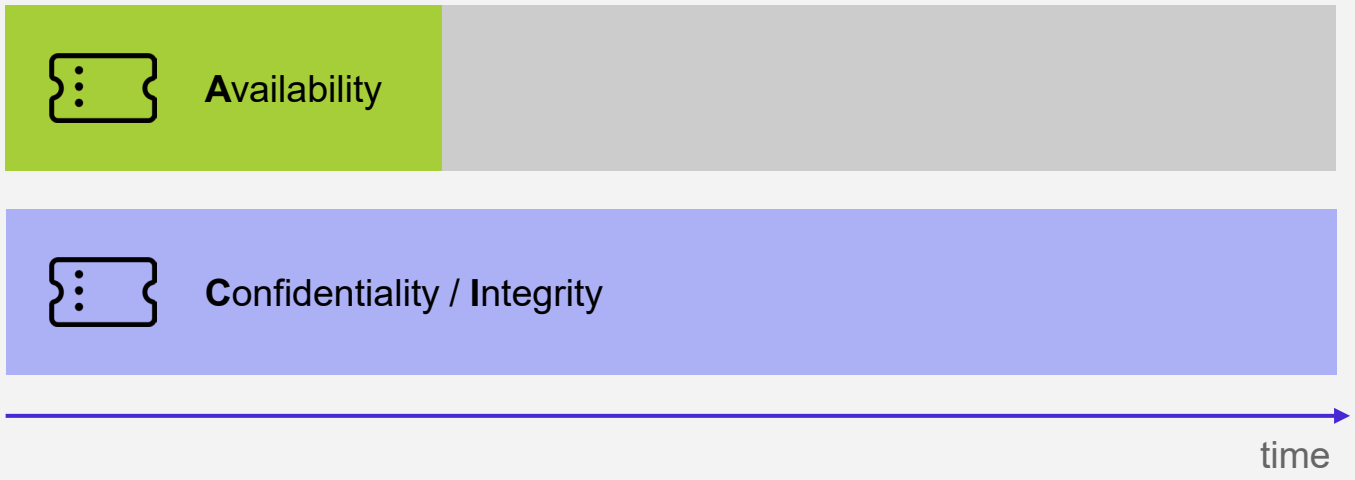
Sec & IT/Ops:

Same Goal (Revenue), Conflicting Responsibilities

Security Competes for IT Attention



Security Tickets

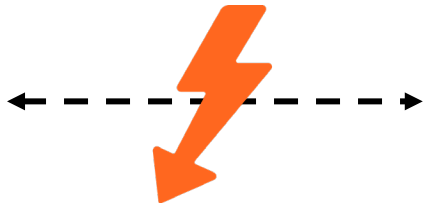


IT Responsiveness

The Problem

Security

- Needs changes made but lacks access
- Has a lot of risk signals
- Data is siloed



IT

- Too many tickets
- Zero prioritization
- Manual work

What Really Matters

Security alignment to business goals

Combating technology sprawl

Signal : Noise Ratio

Axonius

Apply What You Have Learned Today

- Understand the risk unique to your environment and gain better control and visibility over managed and unmanaged assets.
- Leverage your asset data to proactively secure your organization and stop reactively responding to threats.
- Move beyond identifying vulnerabilities to implementing effective solutions by taking action.
